

Omni-channel EPOS System for fashion, footwear & jewellery retailers

e-pos
Factsheet

Business Benefits so much more than just a till

Enhance your instore experience. The right technology to help you process sales quickly and efficiently and engage customers with promotions and upselling opportunities at till point.

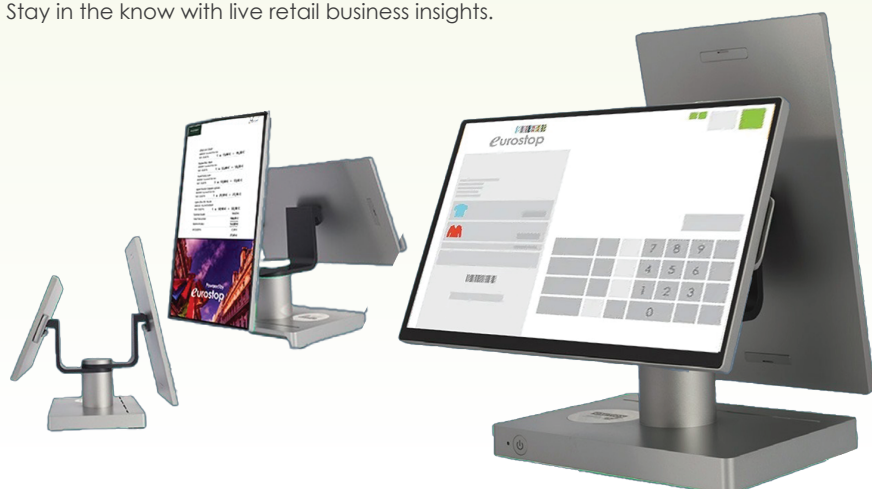

Global parameters and multilingual for international use.

Benefit from a holistic view of company stock from any store - view live product and stock information across the company and never lose a potential sale.

Build your CRM and collect customised customer loyalty information at till point.

Streamline your business with a connected EPOS estate that allows you to communicate with Head Office at the touch of a finger.

Stay in the know with live retail business insights.

The Challenge

In a digital world, customers are looking for a consistent, convenient and connected experience, whichever channel they cross on the path to purchase. This means that retailers need omni-channel technology to support a connected customer journey and an enhanced in-store experience.

The Solution

Eurostop's EPOS software for fashion, footwear and jewellery retailers.

Your Eurostop e-pos touch estate is fully connected to your Head Office retail system. More than just a till, it offers a host of features that enables your sales staff to use award winning technology to enhance and personalise the in-store experience.

Discover how e-pos touch can transform and grow your business.

Key Features At a glance

Inventory Management

Managing the quantity of on-site inventory plays a vital role in the success of your store

International Pricing

Trade internationally with multi currency, fiscal printing and multi language options

Engaging Display Options

As well as customising your EPOS interface to reflect your brand image, full colour multimedia rear display is also available to immerse customers in the store experience

Customer Management

Enables retailers to proactively increase the quantity of high-quality customers

Omnichannel Fulfilment

Notifies and allows store staff to process and track multi channel orders from shipping stores

Direct Deliveries

Stores can book in and update stock against purchase orders

Sales Reporting & Analytics

Allows you to analyse performance
