

## Business Benefits

### Connected systems in a connected world

Streamline your business processes, automate flow of information and reduce error by connecting your IT systems.

Use e-rmis as your focal point and information hub for omnichannel reporting and an all-important holistic overview of how your business is performing.

Allow our in-house development team to connect your IT systems and infrastructure with a retail system that fits your brand perfectly.

Offer your customers a consistent, sophisticated and omnichannel customer experience, whether they interact with your brand or shop online or in store.

## The Challenge

The digital revolution has provided shoppers with an ever more sophisticated experience. A greater range of choice, convenience and accessibility mean that retailers are driven by consumer demand and expectation. To remain competitive, retailers need to empower the customer by building a better understanding of and a stronger connection to their customers.

## The Solution

We undertake custom development to ensure that your existing IT systems and channels are fully connected to your new retail system, giving you the power to do more, with less effort. Our project and development teams have experience of working closely with many types of third parties, which means that you can rely on our highly skilled developers and retail experts to deliver a system that really works.

Discover how Eurostop can enhance and transform your business.

## Key Features At a glance

### Integrations

Connect your selling channels and systems (online store, concessions, ERP, accounting systems, CRM, 3PLs, and more).

### Multi-channel

Automatic synchronisation of sales and customer details across selling channels. Fulfil orders intelligently based on available stock in various locations across the business.

### Real-time

Up-to-date information across a multitude of endpoint systems.

### Connected Customer Experience

Manage, merchandise and report on your selling channels from a central location to provide a consistent customer experience.

### Custom Development

UK based, in-house development teams for truly customised retail systems.

## People Powering Systems

### In house Development Team

We have a large team of UK based, in house developers using the latest technologies and methodologies.

As well as road map development, we also focus on bespoke development for a system that is as personalised as your brand.

### Highly Experienced Projects Team

Our Projects Team are experienced in working with many retailers to ensure a quick and smooth rollout.

We aim to get you up and running with your new retail system as quickly as possible and with minimal impact to your day-to-day operations.

### Real People, Real Service

When you choose Eurostop, you select a new retail system that can help power the growth of your business, but you can also be assured that you will be working with real people. At all stages of the project, you will have a central point of contact - from initiation, rollout, training, to go live and beyond.
